

# secure co-benefits

## OSIRIS REDD+ Biodiversity Analysis (*Busch et al., in press*)

Extinction rate with and without - higher than historical for countries with low deforestation (spp/yr)

# effective national funds

§ protected area trusts

§ development funds

§ carbon banks

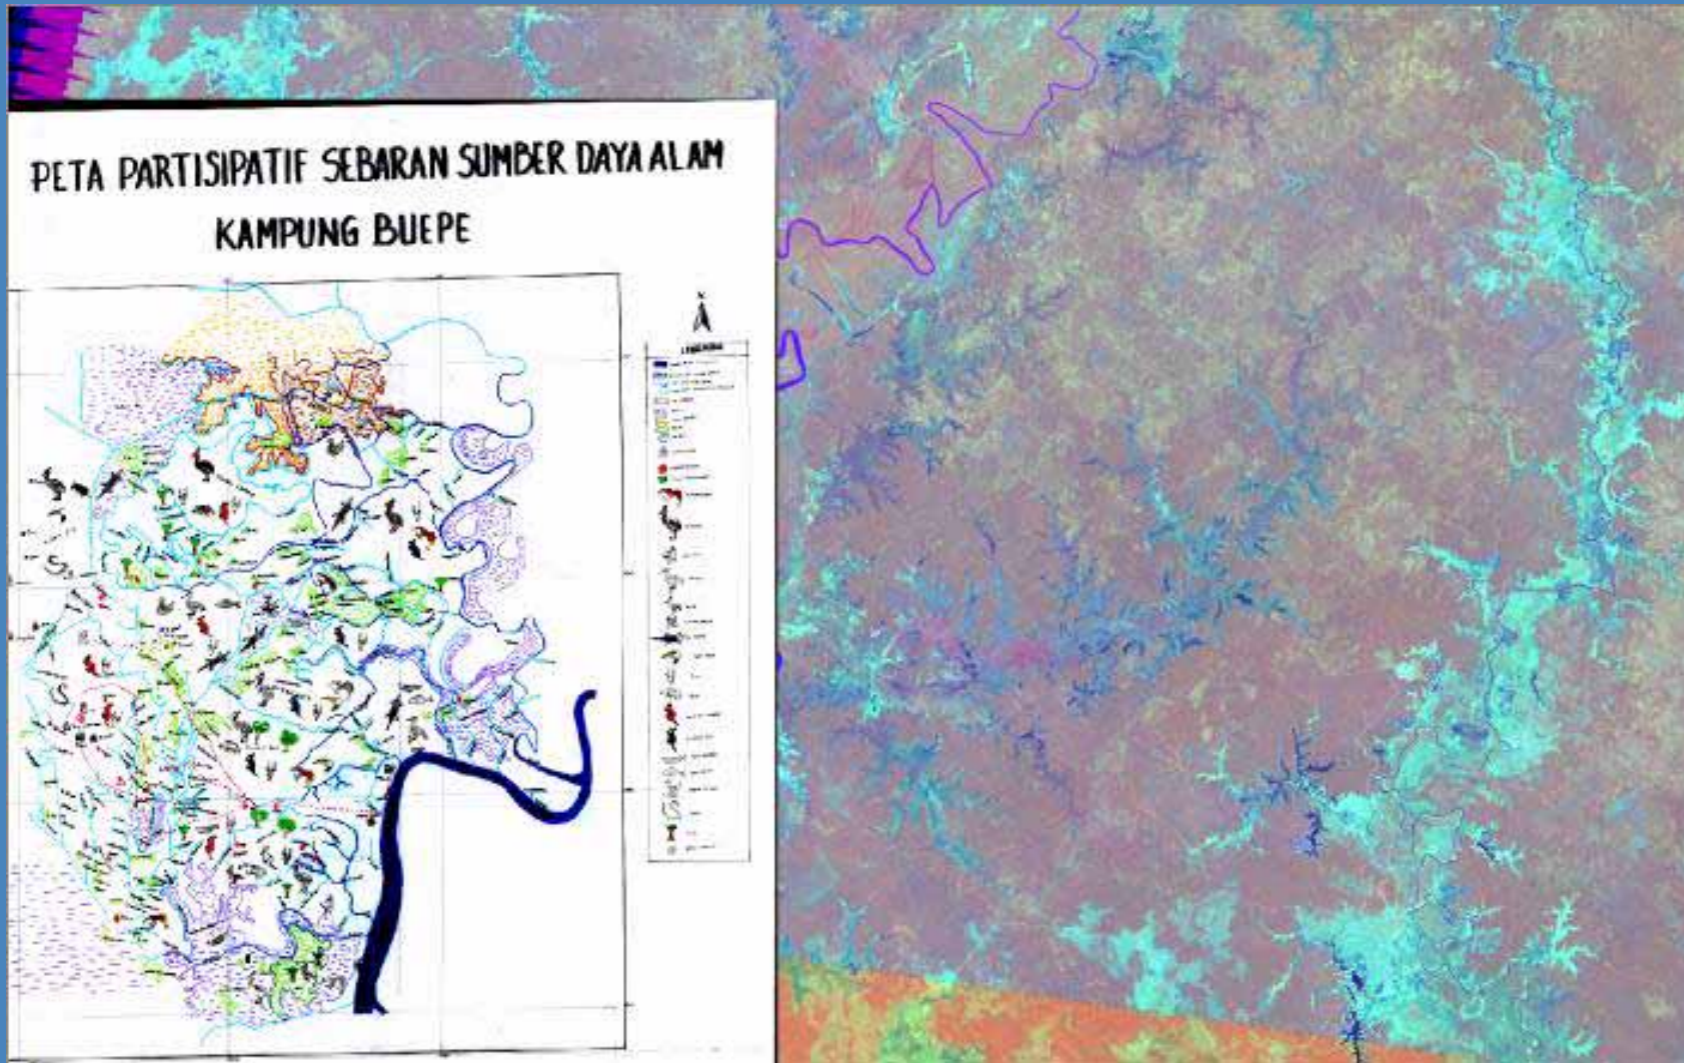

# transparent national financial vehicles

§ conditional benefit transfer mechanisms (PES)

§ payment for performance

# equitable local participation and benefit

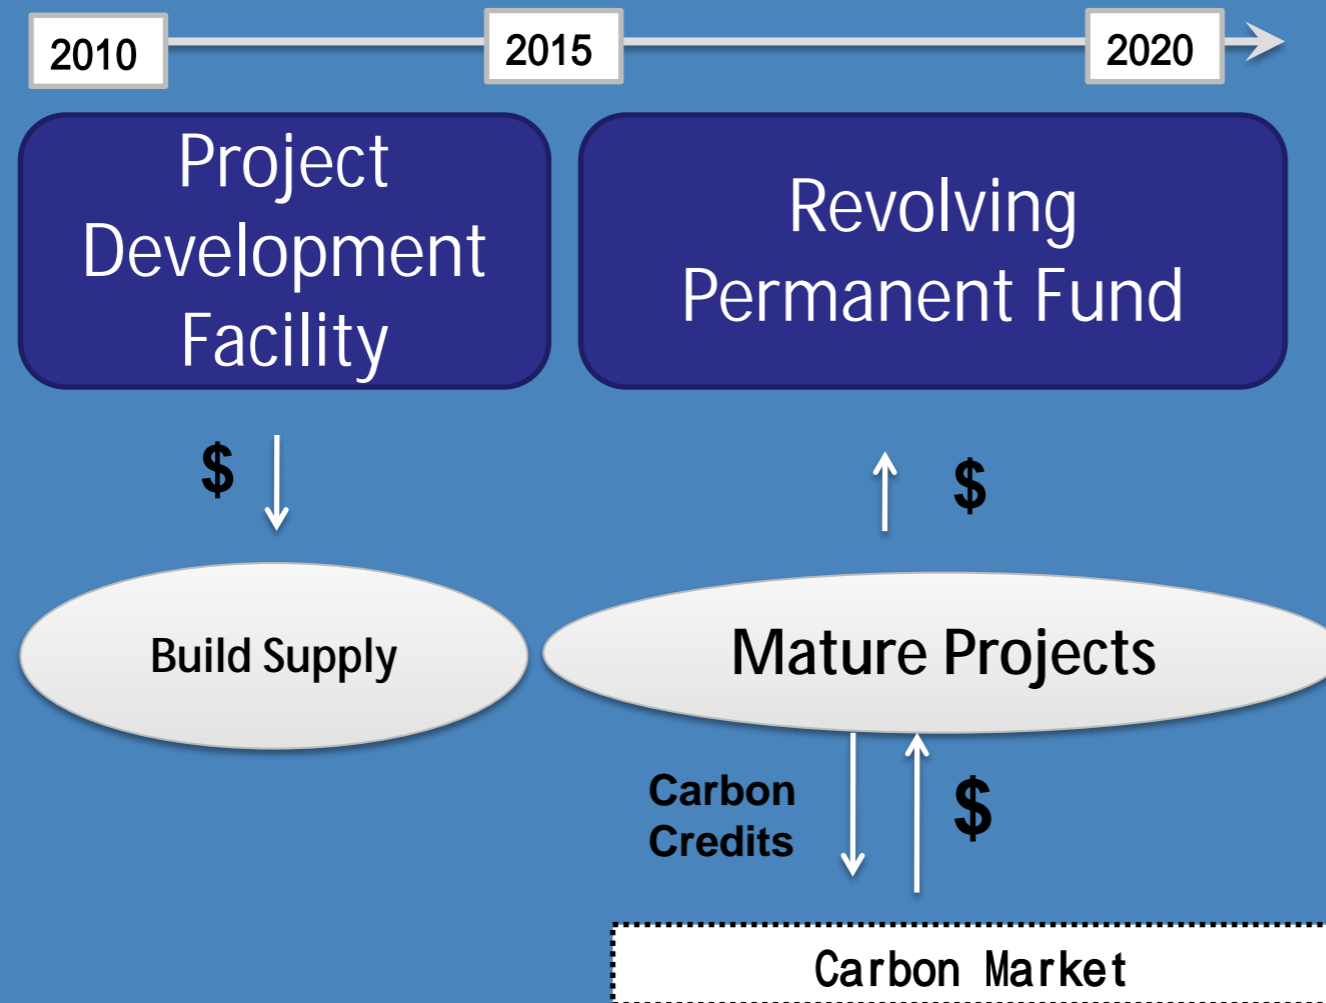

# sound local development projects

resolving drivers of deforestation

# catalytic financing

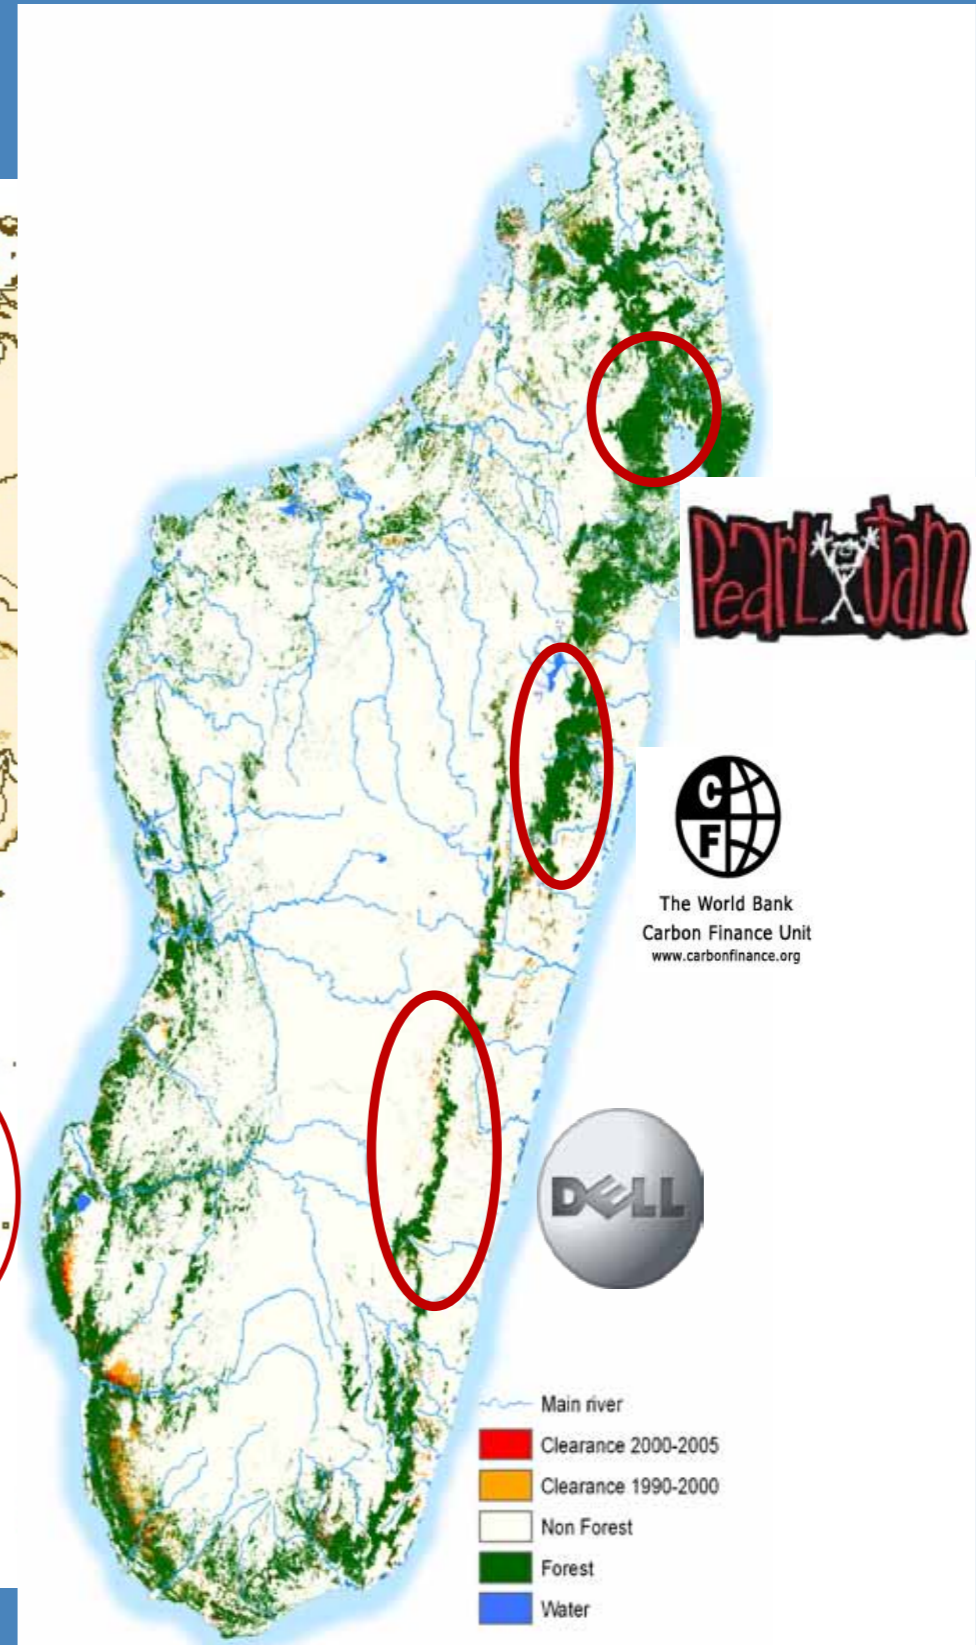

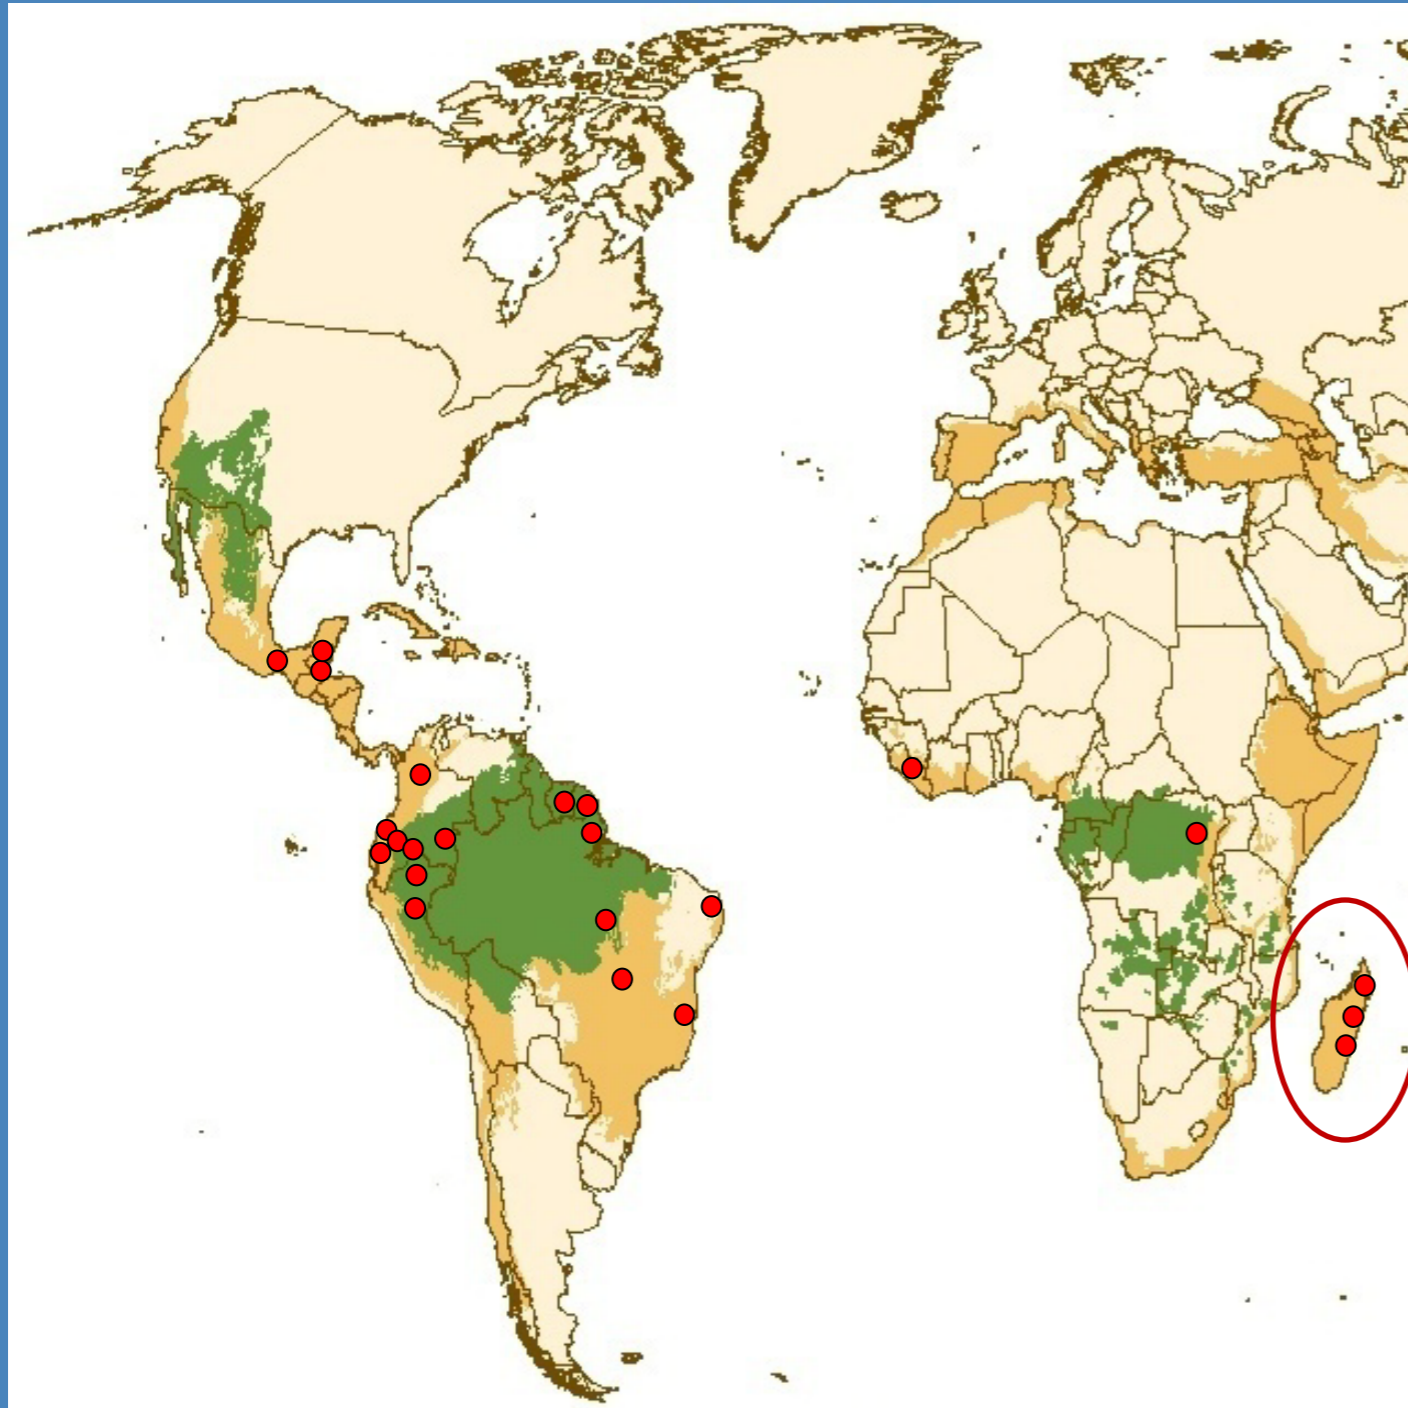

## CI 's Carbon Fund

# corporate leadership

# robust REDD+ supply

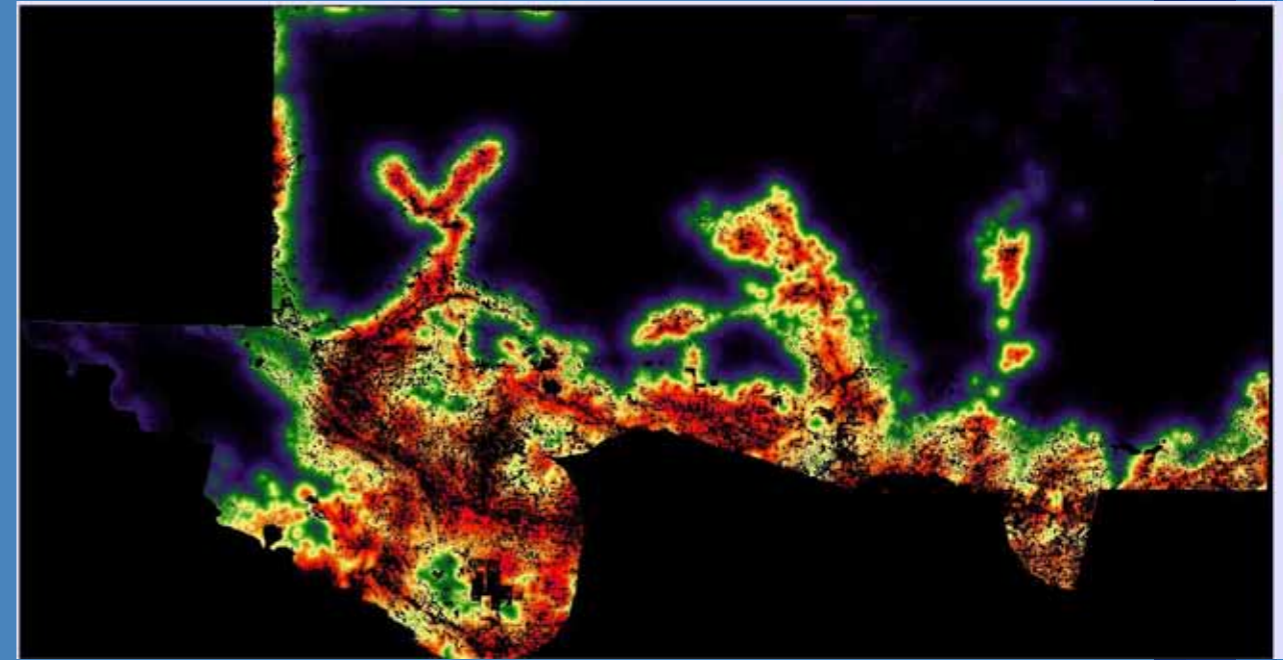

build market experience and confidence

# rigorous baselines and monitoring

actual land cover 2005

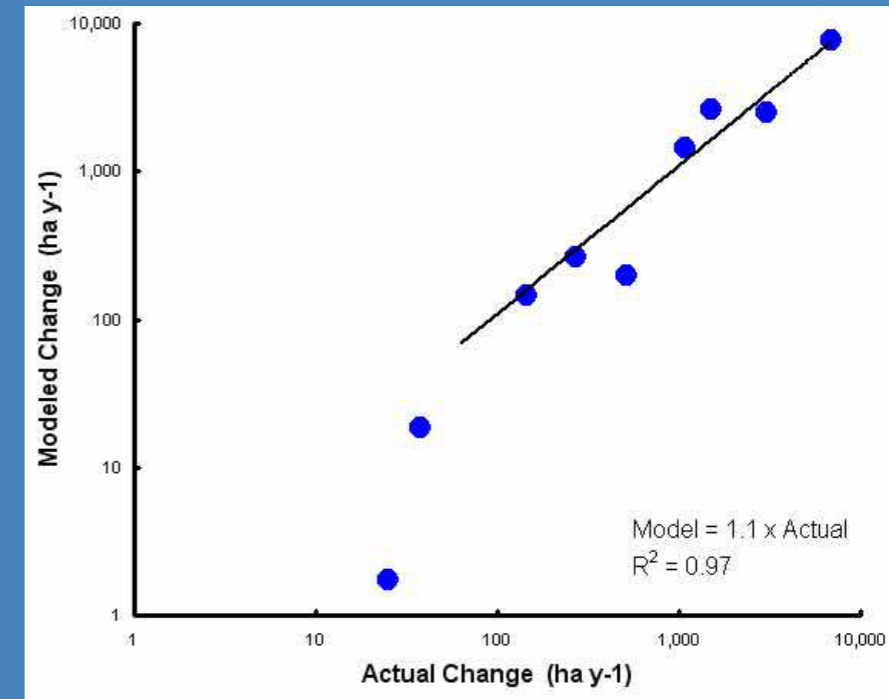

deforestation likelihood

predicted land cover 2005

validation (actual vs predicted change)

# the Fast Track

sound “early action” standards

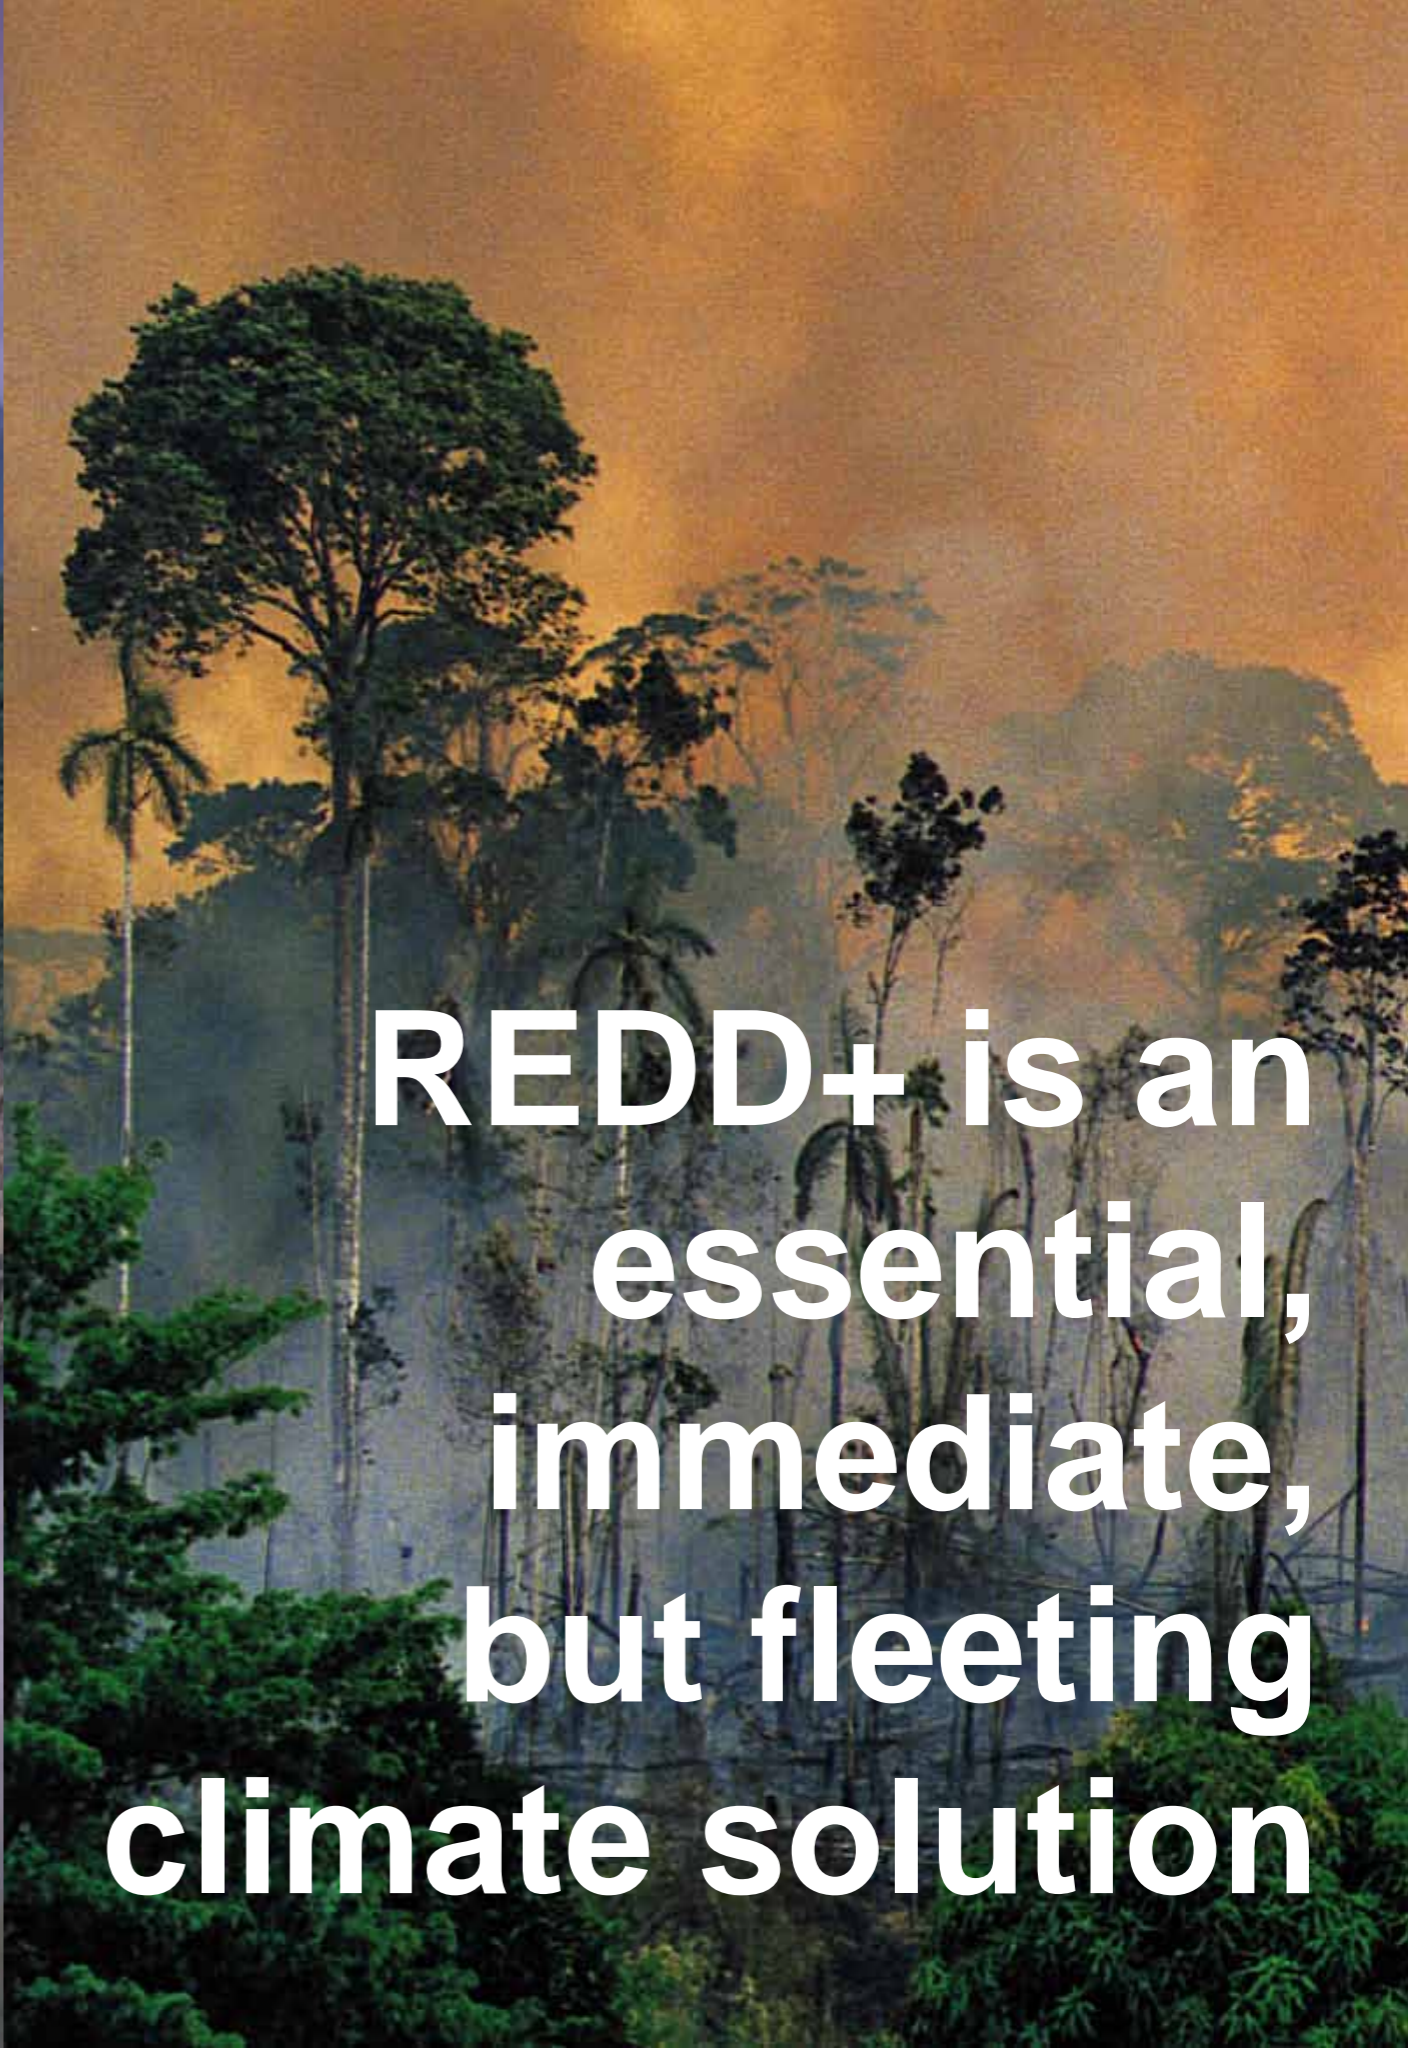

comprehensive, effective national  
REDD+ programs

- national development plans
- economic models
- financial mechanisms
- local engagement
- sound development
- REDD+ supply

market integrity

- catalytic financing
- corporate leadership
- monitoring and reporting

**REDD+ is an  
essential,  
immediate,  
but fleeting  
climate solution**

what are we  
waiting for?

*thank you*
